Forecast For The United Kingdom
Issued by Met Office Exeter
at 1600 on Sunday 14 Nov 2021

++ Valid for broadcast between 1800 and 0600

Headline:
Variable cloud, some rain north and west, showers in southeast.

This Evening and Tonight:
Rain moving south-eastwards across Scotland and Northern Ireland with patchy fog forming as skies clear later. Mostly cloudy across England and Wales, some showers in the southeast, and drizzle in the far west, with some fog patches forming later.

Monday:
Fog clearing through the morning. Rather cloudy across England and Wales, showers far southeast and some light rain west and north. Sunny spells for much of Scotland and Northern Ireland.

Outlook for Tuesday to Thursday:
Unsettled across the far north, with spells of rain, showers and strong winds. Generally more settled elsewhere, although often quite cloudy with overnight mist and fog.
